Assignment 4 Penalty Tally Sheet (Page 1 of 1)

- not starting a variable name in lowercase - not starting a variable name -	Naming Convention:	• Readability Woes: (penalty - depends on sever
- not stating a variable name in lowercase - not using sporting underscores) or camel style in multi-wood name - not using sporting underscores) or camel of variable in all-uppercase - function not doing, or doing more than, what it's name suggests - function not doing, or doing more than, what it's name suggests - function not doing, or doing more than, what it's name suggests - function not doing, or doing more than, what it's name suggests - function not doing, or doing more than, what it's name suggests - function not doing, or doing more than the suggests - function in grain not not not using non-sepached four. - for using more pages [2] - Not train gamespace [2] - Using inconsistent/confusing namespace name/allas (, , , sequenceof Num, seq OF Num, etc.) [4] - Other: - complainting Issues - Not separating interface from implementation (merging them into 1 single file instead) [4] - Including implementation file (which chem may not have access) at top of chem file instead of a bottom of interface file [2] - Allas value hype and appropriately world (via type-def) with class template viperantine parameter [2] - Pating to identify/recognize (and render as template) the one most-template-conductive from in the test driver [2] - Other: - forgram Testing Issues - Not including isst output or not covering minimum required test cases [45, 1, 152, 2, 25, 3, 35, 4, 43, 5, 5] - Other: - The Children Issues - Not including isst output or not covering minimum required test cases [45, 1, 152, 2, 25, 3, 35, 4, 43, 5, 5] - Other: - The Children Issues - Not including isst output or not covering minimum required test cases [45, 1, 152, 2, 25, 3, 35, 4, 43, 5, 5] - Other: - The Children Issues Issues - The Children Issues Issues - The Children Issues - The Children Issues Issues - The Children Issues -	- not using meaningful name	- poor indentation
- not using separating underscore(s) or camel style in multi-word name - name of constant not in all-uppercase or name of variable in all-uppercase - function not doing, or doing more than, what it's name suggests Other: Documentation [9] I 192 2] Not using ramespace [2] Not using ramespace [2] Not or not appropriately filling Success Summary box of cover page, [9]] Not or not appropriately filling Success Summary box of cover page, [9]] Not or not appropriately filling Success Summary box of cover page, [9]] Not separating interface from implementation (merging them into 1 single file instead) [4] Including implementation file (which client may not have access) at upo of client file instead of at bottom of interface file [2] Not bringing at ze_type to bear in functions like at zero (in suppropriating its place with value_type_at ze_t_etc.)[2] Forgram Testing Issues Not including issue expect of a read of rander as templately the one most-template-conductive item in the test driver [2] Other: Togram Testing Issues Not including issue or not covering minimum required test cases [15] 1 15; 2 25; 3 35; 4 34; 5] Other: Togram Testing Issues	- not starting a variable name in lowercase	- poor spacing
- name of constant not in all-uppercase or name of variable in all-uppercase - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing, or doing more than, what it's name suggests - function of doing or doing more than, what it's name suggests - function or doing not doing or doing more than, what it's name suggests - function or doing not doing more than, what it's name suggests - function or doing not doing more than, what it's name suggests - function or doing more function it's name suggests - function or doing more function it's name suggests - function or doing more function it's name suggests - function or doing more function it's name suggests - function or doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - function of doing more function it's name suggests - f	not using consecting underscore(s) or comel style in multi-word nome	noor alianment
- function not doing, or doing more than, what it's name suggests Other: - using 1 or or (looks like 1 or 0) as variable name not using monospaced fout - not using monospaced fout - not using namespace [2] Not using namespace [2] Not considerate the suppopulately filling Success Summary box of ower page, [3] Not considerate the suppopulately filling Success Summary box of ower page, [3] Not separating interface from implementation (inerging them into 1 single file instead) [4] - Including implementation file (which client may not have access) at any of client file instead of at bottom of interface file [2] - Most bringing size cype to bear in functions like size() (inispappopilating its place with value cype, size type of other. - Not bringing size cype to bear in functions like size() (inispappopilating its place with value cype, size type of other. - Other: - Not including issues Not including issues output or not covering minimum required test cases [3, 1, 13, 2, 23, 3, 3, 4, 43, 5] - Other:	- not using separating underscore(s) of camer style in mutu-word name	- poor anginnent
Feneral Issues Documentation [½ 1 1½ 2] Not using unrespace [2] Using inconsistent/confusing namespace name/alias (sequenceofNum, seqofNum, etc.) [½] Not or not appropriately filling Success Summary box of cover page, [½] Other: Pemplating Issues Not separating interface from implementation (merging them into 1 single file instead) [4] Including interface from implementation in (which client may not have access) at on of client file instead of at bottom of interface file [2] Alias value_type not appropriately synced (via typedef) with class templates typename parameter [2] Not bringing wis is_type to bear in functions like is led.) (insuppropriating is place with value type, alias_t, or.)[2] Failing to identify/recognize (and reader is template) the one most template conductive from in the list drive [2] Pother: Pot including lests output or not covering minimum required test cases [½ 1 1½ 2 2½ 3 3½ 4 4½ 5] Pother: Pother: Other:		- line wrap
Documentation [½ 1 1½ 2] Not using namespace [2] Not using namespace [3] Not or not appropriately filling Success Summary box of cover page, [½] Not or not appropriately filling Success Summary box of cover page, [½] Not or not appropriately filling Success Summary box of cover page, [½] Not separating interface from implementation (merging them into 1 single file instead) [4] Not separating interface from implementation (merging them into 1 single file instead of all bottom of interface file [2]. Alia verifies [2] Not bringing size 1/29 to bear in functions like size () (misappropriately suprant pagement [2]. Not bringing size 1/29 to bear in functions like size () (misappropriately is place with value type, size 1/2 (2). Falling to identify/recognize (and render as template) the one most template-conductive from in the test driver [2]. Program Toding leaves Not including test output or not covering minimum required test cases [5:1 1 1½ 2 2½ 3 3 35 4 4½ 5]. Program Toding leaves Not including test output or not covering minimum required test cases [5:1 1 1½ 2 2½ 3 3 35 4 4½ 5]. Doctr. Today [2] Not separating file instead of the	 function not doing, or doing more than, what it's name suggests 	- using 1 or o (looks like 1 or 0) as variable nar
 Documentation [15, 1, 115, 2] Not using namespace [2] Using inconsistent/confusing namespace name/alias (acquenceofNum, SeqofNum, etc.) [15] Not or not appropriately filling Success Summary box of cover page. [15] Other: emplating Issues Not separating interface from implementation (merging them into 1 single file instead) [4] Including implementation file (which client may not have access) at top of client file instead of at bottom of interface file [2] Alias value_type not appropriately spread (that typedels) with class template's typename parameter [2] Not bringing size_type to bear in functions like size() (misappropriating its place with value_type_size_t_etc.)[2] Failing to identify/recognize (and render as template) the one most-template-conductive item in the test driver [2] Other: regram Testing Issues Not including test output or not covering minimum required test cases [15, 1, 115, 2, 235, 3, 35, 4, 435, 5] Other: The Other: 	Other:	- not using monospaced font
 Documentation [15, 1, 115, 2] Not using namespace [2] Using inconsistent/confusing namespace name/alias (acquenceofNum, SeqofNum, etc.) [15] Not or not appropriately filling Success Summary box of cover page. [15] Other: emplating Issues Not separating interface from implementation (merging them into 1 single file instead) [4] Including implementation file (which client may not have access) at top of client file instead of at bottom of interface file [2] Alias value_type not appropriately spread (that typedels) with class template's typename parameter [2] Not bringing size_type to bear in functions like size() (misappropriating its place with value_type_size_t_etc.)[2] Failing to identify/recognize (and render as template) the one most-template-conductive item in the test driver [2] Other: regram Testing Issues Not including test output or not covering minimum required test cases [15, 1, 115, 2, 235, 3, 35, 4, 435, 5] Other: The Other:
